## **Dear Colleagues & Friends,**

It's with great pleasure that I welcome you to the 2<sup>nd</sup> International Congress of the "World Academy of Growth Factors & Stem Cells in Dentistry" (WAGroFSCD), which will be held in **Deemed University, Loni, India** between 25<sup>th</sup> and 27<sup>th</sup> of October 2018, organized by **Rural Dental College, Pravara Institute of Medical Sciences** and with the collaboration of the **University of Bari "Aldo Moro", Italy**.

Our objectives for this Congress will be to link molecular biology with biological guided tissue regeneration techniques in Modern Dentistry, as well as to advance our surgical knowledge and professional dental care with the use of growth factors and stem cells, around the world.

**We are pleased to announce you that WAGRO has the honor to host** the best key note speakers in Dentistry, that will offer you high quality master classes and innovations in dental treatments.

A unique characteristic of this conference is that will take place live training on patients as well as cadaver courses regarding all innovative treatments on growth factors, implantology, bone regeneration and facial aesthetics.

The meeting will also give everyone a chance to get closer together and make new acquaintances, facing new challenges and discovering new pathways for professional development

Enjoy this unique chance to interact, learn and socialize with well-known scientists from all over the world in an environment that is so interesting to discover in western India.

We are looking forward to your presence at the Congress to be a part of this great learning extravaganza.

We once again welcome you all for this conference.

Wishing everyone all the best,

**Ioannis P. Georgakopoulos**  
**President of WAGroFSCD**

## Conference Objectives

### Aim

To provide a common platform to Academicians, Researches, Scientists, Industry Professionals and Students to showcase their research work and create a forum for effective exchange of ideas to tackle the future global challenges from the perspective of emerging trends in Regeneration Medicine, Growth Factors, Stem Cells, Biotechnology and Molecular Biology.

Objective: The conference is being organized to highlight the ever-increasing critical need to encourage innovative solutions with potential for global research.

The conference will encompass keynote addresses, regular paper presentation sessions, panel discussions and presentations from experts. This event also gives an excellent networking opportunity and will foster everlasting friendship among fellow counterparts.
